ARMANI BRONZE

Armini Bronze is an elegant natural marble characterized by its deep bronze-grey background and refined network of fine veining in lighter shades.

The unique geological formation of the Spanish quarry gives each slab distinctive movement and character, ensuring every installation is truly one of a kind.

TECHNICAL SPECIFICATIONS

Apparent density	2,650 kg/m ³
Open porosity	1.7 %
Absorption coefficient by Capillarity	2.80 g/m ² ·s ^{0.5}
Absorption at Atmospheric Pressure	0.6 %
Abrasion Resistance	19.5 mm
Flexural strength	12.2 MPa
Breaking load at dowel hole	2,700 N

FINISHES

- POLISH
- HONED
- ANTIQUE
- LEATHER
- BRUSHED
- SANDBLASTED
- BUSH HAMMERED
